Art Unit: 2833

1. This application has been examined. Claims 1-4 are pending in this application.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Krietzman (USPN 6,575,593).

Krietzman discloses the invention substantially as claimed comprising a USB adapter (21) inherently having a proximal end, a distal end, four wires, an USB connector (13) formed on the proximal end and a USB socket (22) formed in the distal end, wherein the two wires of the four wires are power and ground wires and the other two wires of the four wires are data wires; and two power wires (two long conductive lead wires), having proximal ends and distal ends, and the proximal ends are electrically

connected respectively to the two wires that are power and ground wires in the USB adapter (Col. 2, lines (6-10)); wherein the distal ends of the power wires are connected to a power connector (21); wherein the power connector is a USB connector; and wherein the power connector is a standard DC power connector.
